

4th Eurasian Meeting on Heterocyclic Chemistry (Bioactive heterocycles)

August 27-31, 2006
Thessaloniki
Greece

Venue

Thessaloniki, the second largest city in Greece is One of the oldest cities in Europe. It stretches over 12 kilometers in a bowl formed by low hills facing a bay that opens into Gulf Thermaikos.

It was founded about 315 B.C., on a site of old prehistoric settlements going back to 2300 B.C., by Cassander, King of Macedonia and was named After his wife, Thessaloniki, sister of Alexander the Great. Since then, Thessaloniki has become the capital of Macedonia and its most important commercial port. In Roman times it was visited by Saint Paul, who preached the new religion and who later addressed his two well-known epistles (the oldest written documents of Christian literature) to The Christians of Thessaloniki.

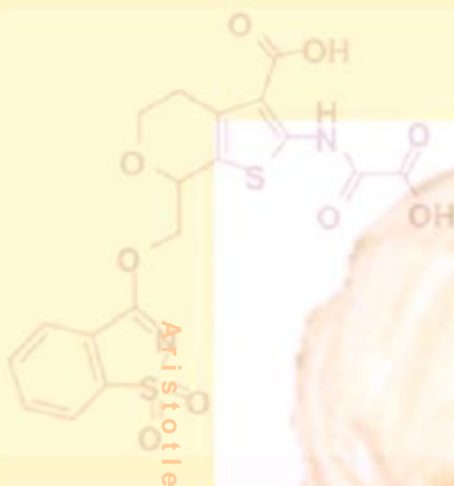

Today, Thessaloniki is a thriving city and one of the most important trade and communication centers in the Mediterranean. Suggested tours from Thessaloniki: the two capital cities of ancient Macedonia, Pella, birthplace of Alexander the Great and Aiges (today's Vergina), Dion, the holy city of ancient Macedonia and Olympus, the mythological residence of the Gods and the highest mountain of Greece.

Aim

The meeting has the goal to bring together scientists from different parts of our continent, actively working in the area of heterocyclic chemistry.

The meeting will deal with all aspects of the chemistry of natural and synthetic heterocycles, medicinal chemistry as well as combinatorial chemistry and high-throughput screening.

Features

Plenary Lectures (50 min)

Invited Speakers (30 min)

Selected Oral Presentations (15-20 min)

Poster Sessions

Organizer

Aristotle University of Thessaloniki, Greece
